

Module 2: A+ Peripherals and Power Supply

DAY 1:-

Task 1:

		Use Case
Printers	1. Inkjet Printer	Printing college assignments and colorful photo prints at home.
	2. Laser Printer	Printing large volumes of text documents quickly in an office.
	3. 3D Printer	Creating prototype models for a product design project.
Scanners	1. Flatbed Scanner	Scanning old family photographs to preserve them digitally
	2. Drum Scanner	Capturing ultra-high-resolution scans of film negatives or fine art for professional printing and publishing
Webcams	1. Built-in Laptop Webcam	Attending video calls for remote work or online classes
	2. External HD Webcam	Live streaming gameplay or recording high-quality vlogs

Task 2:

Task 3:

Interface	Advantage	Disadvantage
USB	Fast, stable data transfer with no setup or network required.	Requires a physical cable, limiting the device's placement and mobility
Wi-Fi	Wireless and convenient - multiple devices/users can share the same peripheral over a network	Slower and less reliable than USB; depends on network strength and can face security/setup issues
Bluetooth	Easy short-range wireless pairing with low power use, ideal for compact/portable devices	Limited range and slower data speed, and not all devices support the same Bluetooth version (compatibility issues)

Task 4:

Step-by-Step Instructions to Connect a Printer to a Computer

Option 1: Connect Using a USB Cable

1. Place the printer near your computer.
2. Connect the printer to a power outlet and turn it on.
3. Connect the **USB-B** end of the cable to the printer.
4. Connect the **USB-A** end to a USB port on your computer.
5. Wait for Windows to detect the printer.
6. If Windows installs the driver automatically, wait until you see a message that the printer is ready to use.
7. If the driver is not installed automatically:
 - Download the correct driver from the printer manufacturer's website.
 - Run the installer and follow the on-screen instructions.
8. Open **Settings → Bluetooth & devices → Printers & scanners**.
9. Verify that the printer appears in the list.
10. Select the printer and click **Print Test Page** to confirm it is working.

Option 2: Connect Using Wi-Fi

1. Turn on the printer.
2. Use the printer's control panel to connect it to your Wi-Fi network.
3. Enter the Wi-Fi password if prompted.
4. On your computer, open **Settings → Bluetooth & devices → Printers & scanners**.
5. Click **Add device**.
6. Wait for Windows to find the printer.
7. Select the printer and click **Add device**.
8. Install the printer driver if Windows prompts you to do so.
9. Print a test page to verify the printer is working correctly.

Final Verification

After setup:

- Ensure the printer status shows **Ready** or **Online**.
- Print a test page from **Printer properties**.
- Confirm the page prints successfully without any errors.

If the test page prints, the printer has been successfully connected and configured.
